Hi,

we've found a problem importing APIs with PDF after changing API's name letter case.

Our env:

- Microsoft SQL DB
- APIM 4.0.0.114
- APICTL 4.0.2

Steps to reproduce:

1. Init **PetStore** API: `apictl init PetStore --oas PetStore.yaml --initial-state=PUBLISHED -f --verbose`
2. Create a PDF inside API folder: `/PetStore/Docs/PetStore/PetStore.pdf`
3. Populate document.yaml:

```
type: document
version: v4.0.0
data:
  name: PetStore
  type: HOWTO
  summary: PetStore
  sourceType: FILE
  fileName: PetStore.pdf
  visibility: API_LEVEL
```
4. Import API: `apictl import api -f PetStore -e dev -k --update --rotate-revision --verbose`
5. Delete PetStore API on Publisher
